

Become a chemistry partner

In 2017, Finnish high school students and graduates accomplished in chemistry will be presented with a volume of Finnish Chemical Magazine (*Kemia-lehti*) for the fifth time. So far, over 1,700 students have been thus acknowledged for their chemistry performance, around 700 of them in 2016.

In Finnish Chemical Magazine, the future professionals will read about the significance and possibilities of chemistry and, perhaps, find inspiration for a career in chemistry.

Half of each gift volume for students is paid by Finnish Chemical Magazine, half by sponsors.

You are welcome to become a partner by supporting the campaign with either 2,500 or 5,000 Euros (+ VAT), which will be invoiced in June 2017.

As a partner you will get more than you give:

- Advertisement space in Finnish Chemical Magazine (print magazine or e-newsletter) in June–December, 2017, for the amount of your partnership attendance.
- Your company logo in the magazine's own campaign promotion advertisement.
- Good publicity in the school festivities and Finnish Chemical Magazine's news items covering the campaign.

Got interested? Sign up as a partner by May 10, 2017.
